

XM Radio is a great benefit to myself! I think it is ridiculous that the NAB is trying to remove weather and traffic reports from XM. There have been many times when I need weather at that particular time, I am in Law Enforcement and it benefits greatly in weather. I am sure once XM Traffic is available in Atlanta it will assist the traffic flow due to more people being advised of accidents and taking alternate routes around the accidnet, making it easier for people like myself to handle the traffic situation.
